

Ron Paulson has been a SCORE Counselor since April 2008 with background and experience in technology, management, planning, government contracting, finance and acquisitions. Technology, management and planning are his primary SCORE counseling areas. He currently runs his own advisory/consulting company, Technical Management & Leadership, LLC.

Ron retired as Vice President of Engineering at Lockheed Martin (LM) Corporate Headquarters in Bethesda, MD on 2/1/08. He was responsible for coordinating all Corporate engineering activities. This includes evaluating Business Unit programs and proposals for engineering problems and providing recommended corrective actions, leading the Corporate Engineering Process Improvement Center, overseeing the implementation of the Corporate Integrated Engineering Process, and serving as the Corporate focal point for engineering training and development.

Ron has 35 years of experience in aerospace management, engineering and R&D. He began his career designing munitions at Honeywell Systems and Research. He then held a series of positions in which he led electro-optics development in the Avionics Lab at WPAFB; managed commercial instruments business and aerospace products development at Barnes Division of EDO; managed the electronics, optics and physics organization of the Lockheed Research and Development Division (now ATC) in Palo Alto, CA; was the Vice President, Programs and Technology for the LM Space Sector; managed the Civil Space Line of Business for LM Space Systems Company (SSC-Sunnyvale, CA); and most recently functioned as the Vice President, Technical Operations, for SSC (Denver, CO).

Ron holds a Ph.D. degree in mechanical engineering with minors in physics and mathematics from the University of Minnesota. His graduate work was in energy transport in high-density plasmas. He holds a Masters of Science in management (Sloan Program) from the Stanford Graduate School of Business and completed the MBA coursework at the University of Dayton.
